🧠 SKILLS

- **Languages:** Python, R, Java (Core), SQL
- **Frameworks & Libraries:** Spring Boot, Spring MVC, REST APIs, Microservices Architecture
- **Cloud & Infrastructure:** AWS, AWS Lambda, Amazon DynamoDB, Serverless Architecture, Prompt Engineering
- **Databases:** MongoDB, Redis, Elasticsearch, DynamoDB, MySQL
- **Frameworks & Libraries:** PyTorch, NumPy, Pandas, JUnit, Mockito

🌐 LANGUAGES

- **English:** C1 - IELTS
- **German:** A2 (Active learning)

🎓 EDUCATION

M.Sc. Data Science,
Georg-August-Universität
Göttingen
04/2026 – Present
Göttingen, Germany

Bachelor of Technology,
Bangalore University
06/2018 – 05/2022
Bangalore, India

🏆 AWARDS

Infosys Certified Software Programmer,
Jnanadeep S R

📄 SUMMARY

M.Sc. Data Science student at the University of Göttingen (since April 2026) with nearly 4 years of professional software engineering experience building scalable backend systems (Java, Spring Boot, AWS). Strong foundation in data analysis, pipeline optimization, and Python. Structured and reliable professional motivated to apply advanced production engineering and data modeling skills to a challenging Working Student role.

💼 PROFESSIONAL EXPERIENCE

Software Engineer, Tekion

04/2024 – 03/2026 | Bangalore, India

- Developed an automated notification system to trigger timely customer alerts (e.g., pre-appointment and post-service), improving customer engagement and satisfaction by 30% through consistent communication and reducing missed appointments by 25%. •
- Led and managed multiple migrations for car dealerships, ensuring smooth transitions from one dealer management system to another. This minimized operational disruptions and helped improve overall efficiency by streamlining processes and reducing downtime.
- Redesigned the appointment booking workflow to enhance user experience and operational efficiency, resulting in a 26% reduction in booking time and increase in customer satisfaction.
- Implemented an integration flow for the appointment booking system, enabling seamless connectivity with upcoming OEMs through simple configurations. This streamlined the integration process, allowing for faster onboarding and reducing manual effort.
- Optimized the audit log system by implementing serverless architecture with Lambda functions, enhancing the tracking of appointment updates and reducing infrastructure costs by around 15%

Associate Software Engineer, Tekion

07/2022 – 03/2024 | Bangalore, India

- Played a key role in the Scheduling Team, managing the appointment booking feature for Dealer Management Systems. Improved the efficiency of the slot availability algorithm, reducing latency by 27% and enhancing user experience.
- Enhanced the consumer-facing appointment booking application by optimizing API response times, resulting in faster performance and an improved user experience. Additionally, Introduced key security measures, ensuring stronger data protection and compliance for consumer-facing applications.
- Enhanced the appointment booking process by integrating the parts reservation system, ensuring parts are reserved for scheduled appointments.

Intern, Tekion

01/2022 – 06/2022 | Bangalore, India

- Developed a Custom Form Builder with drag-and-drop functionality, allowing users to create personalized forms.
